Trainers

Dr. Axel Kohler

- GRADE deputy managing director responsible for the natural and life sciences
- Background in psychology and neuroscience

Dr. Nina Dworschak

- Local Research Data Manager in a joint project called Hessian Research Data Infrastructures (HeFDI)
- Background in Archaeology and Philology

Dr. Karsten Tolle

- Lab Director, Frankfurt Big Data Lab, Institute of Computer Science, Goethe University
- Research interests in Digital Humanities and Linked Open Data

Research Data Management in the Humanities and Social Sciences

Objective

Research Data Management (RDM) is an emerging topic in all fields of the sciences and humanities that have to deal with relevant volumes of data. Apart from the advantages for individual researchers and labs to keep their data organized and make data analysis reproducible, many funding organizations start to require data-management plans and expect that the data are made publicly available and re-usable at the end of the project. The workshop will offer a first basic overview for the most important aspects of RDM. You'll also learn about tools and resources that will help you cope with all aspects of RDM.

Description

Different RDM topics emerge at different stages of the research cycle:

- How do I prepare a data management plan for a project?
- What are the advantages of RDM?
- How can I make my data understandable?
- What are repositories and which ones should I use?
- What are the requirements by my university and funding organizations?
- What is the legal framework for RDM?

We will provide basic answers to the above questions to get you kick-started with your RDM plans.

The workshop covers topics that apply to all scientific fields as well as special tools and resources for the social sciences and humanities. Apart from a general overview through short lectures, we will also let you have hands-on experience with select tools.

Methodology

- Short lectures
- Group discussions
- Practical exercises

Conditions

Please bring your laptop.

Organizational Information

Language	English
Target group	Doctoral Candidates at all stages and Postdocs from the Humanities and Social Sciences
Date	Wednesday, 20 November 2019, 9:00 – 13:00
Registration	**For registration click here**
