QUALIBI

Qualitative Educational Research Data

Empowering FAIR Data Sharing with QualiBi

Findable
QualiBi provides discipline-specific metadata, keywords, and filtering functions for targeted discovery of qualitative educational data.

Accessible
Differentiated access levels ensure the secure sharing of sensitive data while protecting participants and keeping ethical research standards.

Interoperable
Datasets receive standardized metadata and DOIs, enabling cross-referencing within the NFDI framework and seamless citation across research infrastructures.

Reusable
Rich contextualization and discipline-specific documentation support meaningful secondary use of research data.

QualiBi as a Platform & Data Center

QualiBi stands for an interdisciplinary perspective on education - formal and informal, across the entire life course.

As a **data center**, QualiBi develops and maintains a curated repository of high-quality qualitative research data in education, ensuring their long-term preservation, accessibility, and reuse.

As a **platform**, it integrates and connects existing collections, enhancing their discoverability, interoperability, and contextual usability across the educational research community.

Support for Researchers

We accompany your project from planning data collection through managing sensitive materials to the sustainable transfer into QualiBi. Therefore, we encourage you to contact us as early as possible, ideally before submitting a funding application.
