

# QUALITATIVE DATA

Making your data ethical, secure  
and reusable.

[short.ub.uni-frankfurt.de/qualitative-data](https://short.ub.uni-frankfurt.de/qualitative-data)

## Support

**Handling of sensitive data** – Guidance on data protection and secure storage practices.

**Designing informed consent** – Support in creating clear, participant-friendly consent processes.

**Anonymisation** – Protecting participants and preventing harm while ensuring reusability of data.

**Documentation** – Advice on recording research context and processes for transparency and reuse.

**Ethical counselling** – Tailored support for project-specific ethical questions.

## Tailored Workshops

We offer project-specific workshops that address the concrete challenges of qualitative research data. Whether it is

- the development of a tailored metadata schema,
- finding practical solutions for anonymisation,
- or designing documentation workflows,

our workshops are shaped by the needs of your project. The focus is always on applied solutions that researchers can directly implement in their work.

## Get in Touch!

We encourage you to contact us early, ideally before submitting a funding application. This way, we can accompany your project from planning data collection through managing sensitive materials to the transfer of your data into a trusted repository.
