

# Research Tools

Digital tools for structured  
planning, data handling,  
collaboration, and analysis in  
academic research

[short.ub.uni-frankfurt.de/fnd](https://short.ub.uni-frankfurt.de/fnd)

## Support

Advice on selecting suitable tools for the research process

Guidance on sustainable tools and infrastructures (e.g. long-term availability, archival stability)

Hands-on Workshops on research tools

Resource planning for operation and maintenance of research outputs (software, platforms, portals, etc.) for funding applications

## Training & Workshops

We offer workshops and training sessions on relevant technologies and the selection of suitable platforms, including:

- X-Technologies (XML, XPath, XSLT)
- Data cleaning with OpenRefine
- Handwritten text recognition with Transkribus
- Text analysis / visualisation tools
- Writing beyond Word: LaTeX, Markdown, etc.
- GitLab
- eLabFTW
- Object database CODA
